

**VOLUNTARY REMEDIATION PROGRAM  
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

**PROJECT SUMMARY**

<b>Site name:</b>	Former Frankfort Manufactured Gas Plant
<b>Applicant Name:</b>	Indiana Gas Company, Inc.
<b>Site location:</b>	500 Hoke Avenue Frankfort, Indiana 6980709
<b>VRP Site No.:</b>	
<b>Project Manager:</b>	Andrea Robertson
<b>Date received:</b>	July 9, 1998
<b>Date completed:</b>	January 8, 2002
<b>Contaminant(s):</b>	Benzene, toluene, ethylbenzene, xylene, polyaromatic hydrocarbons, cyanide, metals
<b>Media cleaned up:</b>	Surface soil, subsurface soil
<b>Cleanup Objectives Achieved:</b>	1996 VRP Resource Guide Tier II Nonresidential
<b>Deed/Land use restrictions:</b>	Property shall not be used for residential purposes

**Project Summary:** The former Frankfort Manufactured Gas Plant (MGP) commenced operations in 1887 to manufacture gas by coal carbonization process and carbureted water process until 1937. The MGP operations consisted of above ground structures and below ground structures. Contaminated soil above cleanup criteria and below ground structures were removed and properly disposed of in an approved landfill. The structures that were removed from the site for this remediation were a gas holder and a concrete tar separator. Areas of contamination also included in this remediation were a stream bed and oil tank area.
